

1. Test Plan

- 1.1 Overview (about Test Plan)
- 1.2 References (sources referred to prepare Test Plan - APA formatting)
- 1.3 Context of Testing
 - 1.3.1 Project(s) (intro of system/application selected)
 - 1.3.2 Test Item(s) (two complete functionalities per module-per member)
 - 1.3.3 Test Scope (what test type will be covered)
- 1.4 Risk Register (examples of risk in testing and how to manage-not required mitigation)
- 1.5 Test Strategy
 - 1.5.1 Testing Techniques (any suitable black-box technique(s))
 - 1.5.2 Test Entry Criteria and Test Exit Criteria (criteria to start and complete testing)
 - 1.5.3 Test Environment (hardware, software, RPA tool, test data)
- 1.6 Testing activities and estimates (STLC for the selected system/application)
- 1.7 Staffing (each of the team members)
- 1.8 Schedule (simple timetable for the testing)

2. Test Case Specifications

- 2.1 Overview (about Test Case)
- 2.2 References (sources referred to prepare Test Case - APA formatting, Test Plan is one of it)
- 2.3 Test Cases (to design total 5 test cases (positive test cases + negative test cases) per module by using the given template)

3. Test Execution Status Summary

- 3.1 Test Execution Overview (table format of test execution by using the given table template)

Remarks:

- Use this table of content to prepare each of the testing artifacts.
- Do not change the numbering or add any new sub topics.
- Remove the () from each content, it's just for references.
